LANGUAGE-SERVER

 Copy as Markdown

serverpod language-server

`serverpod language-server` starts a Serverpod language server that communicates over JSON-RPC 2.0. It is meant to be launched by an IDE integration rather than run directly, and it powers features like diagnostics in your model files (`.spy.yaml`, `.spy.yml`, and `.spy`).

See [Language server](#).

Usage

Launches a serverpod language server communicating with JSON-RPC-2 intended to be used with a client integrated in an IDE.

```
Usage: serverpod language-server [arguments]
-h, --help          Print this usage information.
--[no-]stdio        (defaults to on)
```

Run "serverpod help" to see global options.
