## Roadmap & contributions

Serverpod is built by the community, for the community. We believe the best software comes from collaboration, where many people contribute their ideas and skills. That's why we strive to make contributing as easy as possible and share our plans for future development in our public roadmap.

### Roadmap

Serverpod's [roadmap](#) outlines the features and improvements that are planned for the project. The roadmap is subject to change, but provides a good overview over work in progress and what is planned for the future.

If you are considering contributing code to Serverpod, please check the roadmap to see if your contribution aligns with the project's goals.

## Contributions

There are many ways to contribute to Serverpod's development. If you're interested, check out our [contribution guidelines](#) to learn how you can contribute code, report bugs, and suggest improvements.
